Projects

Text to Speech TTS_Text Reader

The app features a Text to Speech (TTS) module where users can write messages that the app will read aloud and save as audio. Additionally, users can chat with others by speaking in multiple languages, and the app saves the chat history.

AI Eng Spell Checker Keyboard

Welcome to the future of typing with the AI English Spell Checker Keyboard, an innovative Android application designed to enhance your writing efficiency and accuracy. This state-of-the-art keyboard is not just a typing tool; it's your personal assistant for all your writing needs.

Camera Magnifier + Flashlight

The app includes a live magnifier feature that allows you to touch an image for a magnified view. It also has a flashlight module and the ability to save media.

Wifi Password Show & Analyzer

Wifi Analyzer and Speed Test is the perfect application for you if you want to get information about your WiFi connection and check who is on your WiFi network. By analyzing signal strength and displaying less-crowded WiFi networks, WiFi Analyzer and Speed Test let you maximize WiFi speed. WiFi Analyzer helps you display nearby WiFi connections and analyze their strength. WiFi Analyzer/WiFi Optimizer increases network performance by analyzing and monitoring your WiFi speed.

Time Warp Scan - Face Scanner

Time Warp scan and Face scanner is a trendy warp camera effect for creating a funny face with the help of a face filter. Time warp filter is a basically face scanner with amazing face filters, warp effects, slit scan effects, face distortion and face swap functionalities. With Funny filters you can create funny faces and also convert simple images into different funny faces with TIME WARP SCAN FILTER.
